

Remanufactured EL365 Compressor

365000- 2nd Generation Head

280-8823K (C-13)

285-8823K (C-15)

If you are finding your Cat compressor is pumping oil and the build up time is slow....we have a permanent solution. Have your EL365 air compressor built with today's technology...90% of air compressor's draw their intake air from a positive air source. We have your answer! By using the 2nd generation head and installing our new installation kit, you will solve your problem for the life of your truck.

- Stop the oil pumping which provides your air system with clean air.
- Improved build up time by 2 CFM because of intake flow
- Improved fuel economy
- Increased horse power
