- Having a hard time to find a decent core to rebuild your Maxi Brake?
- Never have the right porting or rod length?
- Is the chrome shaft pitted?
- Boot and hardware worn out?

Your troubles are over!

We are now stocking NEW "CORE FREE" MAXI BRAKES

Available in TYPE 24, 30 & 36

"CORE FREE"

Long rod is supplied on all models so you can cut the rod to length

Unit is assembled with aluminum piston and nylon bearings resisting side and twisting motion

All units come with "grade A" mounting nuts, washers, clevis and pin

Each unit is multi-ported (DIDO), which means units will fit all applications.

Powder coated steel housing provides excellent strength and corrosion resistance.

- This safety brake can't be released manually, insuring the unit will not be moved until the air supply is restored to a safe level.
